

Task Systems are proud to introduce ARC,
an innovative mobile wall for the agile office.

Available exclusively at TASK.

ARC: Connecting Spaces

Collaborative spaces have become an essential part of any workplace interior, encouraging people to come together, communicate and share ideas. Furniture used in these areas should foster face-to-face interactions while also improving co-operation and productivity.

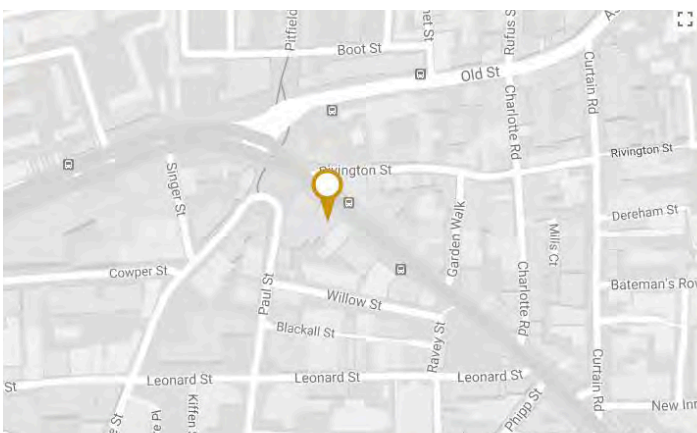

ARC is specifically designed to be an integral part of any collaborative space and to re-wire the social culture and communication within an organisation.

Ideal for use in an open work environment, ARC acts as a space divider and sound absorber while keeping the area inviting and easily adaptable. It's mobile nature encourages spontaneous meetings and fosters creative interactions.

ARC is a universal collaboration solution designed and a true problem-solving innovation which remains ahead of the curve.

Designed and manufactured exclusively by TASK.

Visit our [Showroom](#) to see ARC on display.
