

MAERSK

TASK Project Reference
Completed Jan 2021

MAERSK

Once again we had the pleasure of working with Maersk, the largest container shipping company in the world, on a reconfiguration of an existing office at Mallards Reach. We were delighted to be a part of this innovative restructuring and fit-out where new building space was merged with current offices creating extended new workspace, stretched over 3 floors and accommodating approx 300 people.

Within the products supplied by TASK were LiFT2 sit-stand workstations, supplied with a bespoke raw steel cable tray and real ply core laminate tops paired with the AiM1 task chairs. Storage elements included bespoke lockers with electronic swipe card access and MFC desk high cupboards topped with planters. Meeting rooms feature WORK tables accompanied by ICF Stick chairs and the collaborative spaces brought together Arc mobile wall, flip top tables and Vine chairs.

Each phased installation of around 100 working positions plus all associated elements had to be completed over a single weekend, with the end result being a very successful project delivery completed over three weekends by TASK Logistics team.
